This Poem is brought to you for free and open access by the Student at Carroll Collected. It has been accepted for inclusion in The John Carroll Review by an authorized editor of Carroll Collected. For more information, please contact connell@jcu.edu.
WORDS OF WIKIPEDIA

Dominic Gideon

In the beginning was the *Word*,
But the Word turned into many words,
And now *linguistics* carefully dissects these words,
Turning them into just another *scientific* category
In this *modern era* where everything must be understood,
Where the way a historian goes about her trade
Is turned into a *historiographic* analysis,
Where *cultural studies* unveil all the
Hidden truths behind society.

I get tired of all the academic *discourse*—
Professors preaching *semantics*,
Scientifically extracting *meaning* which words *convey*.
Sometimes I want to enjoy an *idea* without
Diving deeply into its *philosophy*.

We use *language* as *communication*
To disseminate *information*, send a *message*,
*Verbalize* what we want others to hear.
But what happened to that inaudible, unwritten,
Mysterious *Word* from the beginning?
